A Table of all the *Bishopricks* in *England* and *Wales*.

With the Number of Cities, Market-Towns,
and Parishes therein, at this Day.

<i>Names of Bishopricks,</i>	<i>Cities.</i>	<i>Mark. T.</i>	<i>Parishes.</i>	<i>N. of Bishopr.</i>	<i>Cities.</i>	<i>Mark. T.</i>	<i>Parishes.</i>
1 Canter. A. B. }	2	17	398	14 Hereford	1	8	176
2 Rochester }				15 Oxford	1	10	208
3 London	2	43	1165	16 Gloucester	1	24	246
4 Lincoln	1	68	1214	17 Peterboro.	1	13	373
5 Winchester	1	26	398	18 Bristol	1	18	248
6 Ely	1	8	163	19 S. Davids	0	23	416
7 Salisbury	1	31	445	20 Llandlaff	0	12	245
8 Chichester	1	18	322	21 S. Asaph	0	13	169
9 Exeter	1	59	555	22 Bangor	0	7	142
10 Bath and Wells	3	53	385	23 York, A.B.	1	57	731
11 Norwich	1	54	132	24 Chester	1	17	111
12 Worcester	2	22	310	25 Carlisle	1	13	84
13 Lichfield & Coven.	1	34	416	26 Durham	1	11	118

The Number of Bishopricks in *England* and *Wales*, are 26; whereof two are Arch-bishopricks.

The Number of Market-Towns in all the aforesaid Bishopricks, are 639.

The Number of Parishes in *England* & *Wales* are 10250.

The Number of Cities in the several Diocesses are 26, equal to the Number of Bishopricks.

Another useful Observation.

In the Year are { 52 } Weeks,
 { 365 } Days.
 { 8860 } Hours.

Time shews the way, Of Lives decay.

TRIGGE.

Here followeth an exact Catalogue of all the Fayrs in England and Wales, Alphabetically; with a Geographical Table of the distance of the principal Places in England, and the ways to them.

From Rye to London sixty one miles.

First to Pimwell fifteen, Canbridge one, Chesham seven, London seventeen.

TRIGGE.

An Astrologo-Physicial Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	{ bleed the	D	{	♄, or ♀.
		Cholerick				♁, or ♄.
		Phlegmatick				♂, or ☿.
		Melancholly				♁, ☿, or ♄.
			being in			

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☾ is in ♁; with Pills, when she is in ♄; with Portions, when in ♀, because then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the Stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♄, ♀, or ♂ in any good Aspect of ♀, ♀, or ☉.

Glysters are most conveniently administred, when the ☾ is in ♀, ☿, or ♀, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♄, ♀, or ♀; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♁, ♁, ☿, or ♄, in Aspect of ♀, or ♀.

Convenient to cut Hair, the ☾ being in ♁, ♀, ☿, or ♄, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

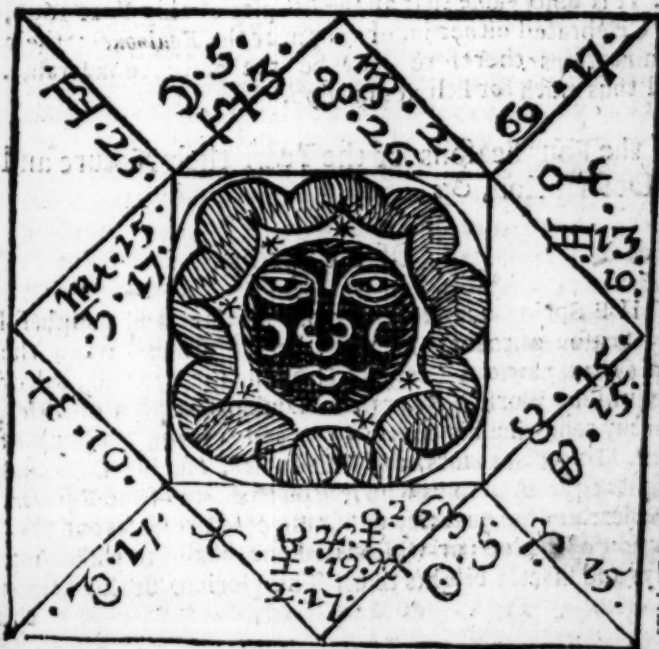

TRIGGE 1690.

Of the ECLIPSES of the Sun and Moon, which will
Happen in the Year 1690.

T Here will, according to the Doctrine of *Astronomy*, this Year happen four Luminarian Eclipses, viz. two of the Sun, and as many of the Moon; and they will be Celebrated in the following Order.

I. The First Defect will be of the Sun on February the 28th day, about Eleven of the Clock at night, in 21 degrees of *Pisces*. It will be invisible as to us; yet to such as inhabit our *Antipodes*, the Sun will be more than half obscured, it falling very near their Diurnal Meridian.

II. The second will be a *Lunar Deliquimm*, and happens on the 14th day of *March*, about our 10^o a Clock at *Night*, it fails in 5 degrees of *Libra*, and will be visible to *England*. Pray observe the figure and type thereof.

This Lunar Eclipse is Equinoctial, and therefore the more eminent will be its Effects in those places, and up-

T R I G G E, 1690.

on those persons to whom they relate. *Proclus* says, the Moon Eclipsed in *Decem Libra primis gradibus*, *grandines & fædas aëres tempestates provocat*. *Ptolemy*, *Cardan*, *Guiffus*, *Junstine*, &c. say much more; but I have no room to quote their words. I shall therefore say no more of this Eclipse.

III. The third will be a Solar Obscuration, on *August* the 24th day, about one of the Clock in the Morning, and happens in eleven degrees of *Virgo*. But will be Inconspicuous as to us; yet will appear a very great Defect in the more Southern parts of the World; where the glorious body of the Sun will be Two-thirds darkned.

IV. The last will be an invisible Eclipse of the Moon, as to us in *Great Britain*, and falls on *September* the 8th day, about our Two of the Clock in the Afternoon: 'tis Celebrated in 26 degrees of *Pisces*. *Proclus* of such an Eclipse says, -- *Latrocinia & rapinas terra marique promiscuus minatur*. It is observable that all the Eclipses of this Year 1690, are Celebrated either in, or very near the *Equinoxes*; their Significations therefore must be the more considerable. And thus much for Eclipses in 1690.

Of the Four Seasons of the Year, their Nature and Description, &c.

I. Of the Spring.

THE Spring-quarter, the most pleasant and delightful Season of the whole Year, begins always when the Sun (that glorious Lamp of Heaven, the Eye and Soul of the whole World) enters the Equinoctial Sign of *Aries*, thereby renewing his course to us, and reviving the Souls of Men, Minerals, Plants, and Vegetables, making Days and Nights equal. And to us who live on this sign of the *Equator*, He encreases the quantity of Sunshine, or decreases our proportion of shadow; or which is all one, begins to make long Days and shorter Nights to us. This glorious Season begins

this

TRIGGE, 1690.

this Year in our Horizon, on the Ninth Day of *March*, at thirteen Hours Afternoon; or, at One a Clock on the Tenth Day in the Morning. It is hot and moist, sanguine, youthful, vigorous.

The Summer-Quarter ever initiates where the Spring ends; when having passed the Three Signs of *Aries*, *Taurus*, *Gemini*, He touches the first Scruple of the Tropical Sign *Cancer*; at which time, (He being then at his greatest distance from the Earth.) He maketh longest Days and shortest Nights to us inhabiting these Northern-parts of the World. And this gallant comfortable, and refreshing Season begins with us in *London*, (the Metropolis of *England*) upon *June* the 11th Day, between the Hours of Three and Four in the Morning. The Sun himself then arises in the *Horiscope*, guiding the East, and comforting the lives of the Mortals.

The Harvest or Autumnal Quarter, begins when the Sun hath finished his perambulation through the Signs of *Cancer*, *Leo*, *Virgo*, and enters the first Point of the Equinoctial Sign *Libra*; there making Days and Nights equal all the World over, under the Poles excepted. Now the Night begins to exceed the Day in length; and all things sensitive and vegetive begin to lose their strength and glory, and decay apace according to the decree of Nature. This Season is cold and dry; 'tis also melancholy, and represents the declining age both of Men and Plants, &c. It receives beginning this Year on *September* the 12th Day, about our Season of the Clock at Night: at which time the Celestial *Taurus* mounts the Horizon, and the envious Planet *Saturn* is in the West-Angle. If you ask me what he doth there, I must answer, No good to be sure; but to give you an account of the evil, is not convenient for me in this place.

The Brummal or Winter-Quarter begins when the Sun, having transited the three Autumnal Signs, viz, *Libra*, *Scorpio*, and *Sagittarius*, enters the first Minute of the Southern Tropick of *Capricorn*; at which time He having finished his greatest Southern Declination, begins to approach a-

TRIGGE, 1690.

gain towards us, that inhabit these Northern-parts. The The Diurnal Arch of the Sun, or his stay above the Earth, is but small, and his Nocturnal Arch very great, making now shortest Days and longest Nights with us, The Heat or Solar Warmth is now at the lowest, and Cold begins its Regency, and tyrannizeth at this time to purpose over all things. This Season is cold and moist, Phlegmatick, and properly assimilated to Old Age, or Death: It Inchoates this Year on *December* the 11th Day, between 7 and 8 in the Morning. The fiery Sign *Sagittarius* doth Horescopeate in the East: A hot Sign ascends at the Ingress of a cold Quarter, which may mitigate the fury thereof, at least for the first of the three Months it continues: And this shall serve to be said of Quarterly Ingresses.

Upon the 10th Day of *Novemb.* this Year, there will be Celebrated a famous Conjunction of the two Infortunes, *Saturn* and *Mars* in *Scorpio*, in 23 Degrees. *Dassiporius* tells us, that the Conjunctions of the Infortunes makes a Fortune. I am sure we in *England* have not always found it so; I should be glad that it might prove so now. Possibly different Degrees of the *Zodiack* may have different Influences or Effects, according to the Doctrine of the Barbarick Sphere, and of *Foannes Angelus*, that witty *Venetian*: And so the first Degree of *Scorpio*, and the twenty third thereof, may not prove alike pernicious: (God forbid they should.) But I remember to have read in *Stow*, that just after such a Conjunction of *Saturn* and *Mars*, in *Scorpio*, 23 Degrees, 1585. the the great Sweating Sicknes followed: From such or the like dire Effects deliver *England*, O God, this Year and ever.

Sundry

Sundry Excellent Astrological

Rules to be Observed in Agriculture, Husbandry, &c. according to Claudius DARIOT, and other Learned Astrologers, Physicians, and Philosophers.

IT is not unknown (but by daily Experience demonstrated) to those of Cain's Profession, (viz. Tillers of the Ground) that all Plants, Seeds, and other things, which are produced out of the Bowels of the Earth, (having her for their common Parent, as it were) do receive both Increase and Decrease by the motion, and position of the Moon, and therefore it is, that the careful Husbandman in Sowing Seeds, planting Trees, grafting Scions, pruning Vines, gathering Fruit, felling Timber, darning Land, and in all other necessary Appendices to Agriculture, that he may the better reap the Fruits of his Labour and Toyl, should be acquainted with the Influences of the Moon and Stars, as the Noble Virgil approves of in his *Georgicks*. And that his expectations may be the better answered, he ought in the first place to have a special regard to the state and condition of Saturn that he be not impeded or afflicted in the beginning of any Rural affairs, for that he is the Ruler of Husbandry, and hath Dominion over all Terrene Commodities. Let him therefore (if you can so order it) be in good aspect of Jupiter or Venus well affected, not Peregrine, Retrograde, or Combust, but rather in some of his own Dignities, in good Configuration of the Moon, free from the Beams of Mars, who, in this Case ought to be weak, Cadent, Peregrine, Combust, void of all Dignity as well Essential as Accidental.

Let all manner of Grain or Corn be sowed when the Moon increases, in Signs movable, as Aries, Cancer, Libra, Capricorn or, if she chance to be in Taurus, Virgo, Sagittarius, Pisces, let her be in Sextile or Trine of Saturn; if your Land be moist, or the Seed of a moist nature that is sown, then let the Moon be decreasing in Virgo, Capricorn or Aries. — If your Ground be dry, and the Seed of a like condition, let the Moon be increasing in Cancer or Pisces, in good aspect to Saturn, who, together with the Moon should be in good configuration of Jupiter or Venus, — but if your Land which

TRIGGE, 1690.

Is to be Sown be of a middle Constitution or Condition, viz. betwixt dry and moist, it is then good to Sow it, when the Moon is in Libra, well befriended.

What you intend to Plant, let the Moon be in Conjunction, Sextile or Trine of Saturn, free from the Body or ill Beams of Mars in a fixed Sign, as Taurus, Leo, Scorpio, or Aquarius, and let her be in some aspect of Jupiter or Venus, if possible.

In planting Trees or Vines, let the Ascendant be Fixed, and the Moon placed in an Earthy Sign, as Taurus, Virgo or Capricorn, in good aspect of Saturn.

Graft or prune Trees the Moon decreasing in Aquarius chiefly and in aspect of Jupiter or Venus.

Fell Timber for Architecture from November the 22. to January 22. the Moon decreasing in Taurus, Virgo or Capricorn, and let her be in good aspect of Saturn.

Plash Hedges, fell Wood for Fuel, that the Stocks may the better grow again, the Moon increasing in Aries or Libra, chiefly in the first quarter, Jupiter or Venus assisting.

Cut Vines in December, January or February the Moon in Aries, Taurus, or Libra. --- Remove Trees when she is in the same Signs, all the last quarter in November, December, or February, and dung Land, to prevent Weeds, in the last quarter.

Good to till Gardens, to Sow and set Plants and Herbs; to set Hop-poles and make a Hop-yard, The Moon in Libra or Aquarius.

Gather Apples, and other Fruits, Herbs and Flowers, to have them large and fair, the Moon increasing toward the Full: to keep and preserve them in store, gather them dry, the Moon decreasing, in aspect of Jupiter or Venus.

Shear Sheep, cut Grass for Hay, the Moon increasing, so it will Spring again the sooner.

Kill Fat Swine near the Full, the Fat will endure boyling the better, and waste less then if kill'd at other times.

Get Cattle, knit Lambs, the Moon decreasing free from the beams of Saturn or Mars, and in some aspect of Jupiter or Venus,

See Beans or Pease in the New Moon, and they will ever be blooming, and so run all up into Stalks: This is affirmed by that excellent Philosopher, Sir Ch. Heydon, in his admirable Defence

of
